The symphony of the new feat

THE SYMPHONY OF THE NEW FEAT

Objectives

To present the major IT companies of the region to the visitors of SPIEF

Solution

We developed a neural network, which wrote a symphony, based on the dataset of COVID spread in the city

How did it work?

Sick people were represented by the first piano melody
Recovered people were represented by the second piano melody
The deceased were represented by a click sound

Results

- An interactive installation about the heroism of the doctors and in memory of the deceased
- We became headliners of SPIEF
- We were recognized by the medical workers and the minister of health

By the way   ANO "Artificial Intelligence Center "Gorky", developed a high-precision COVID 19 propagation model. It allowed taking accurate administrative decisions to prevent the spread of the disease.
